EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Laurence Greenberg on October 12, 2004.

The application has been amended as follows:

IN THE CLAIMS:

Claim 21 (Currently amended) A receiving and coupling part, comprising:
a carrier with an opto-electronic transmission and/or reception element;
an opening for inserting said carrier;
a casting material surrounding said transmission and/or reception element;
a coupling region for coupling an optical fiber; and
a cylindrical recess having a first end and a second end, said cylindrical recess having an overall length and a given diameter, said given diameter being constant along said overall length;
said first end of said cylindrical recess containing said transmission and/or reception element;

Art Unit: 2874

said second end of said recess for receiving and coupling an optical fiber; and
said casting material forming an integrated lens.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Regarding claims 1-30, the applicant's arguments filed July 26, 2004 regarding the Kragl reference are deemed persuasive. U.S. Patent No. 4,410,469 to Katagiri et al. ("Katagiri") discloses a similar invention including a cylindrical recess, leadframe carrier, and integrated lens comprising a casting material. However, the Katagiri reference does not teach or suggest using a cylindrical recess having an overall length and a given diameter, said given diameter being constant along said overall length as recited by independent claims 1 and 21. As seen in Figure 7 of Katagiri, the cylindrical recess (19) housing the integrated lens (36) has at least two substantially different diameters along its overall length. With regards to independent claim 20, the Katagiri reference does not teach or suggest using an S-shaped leadframe. These differences between Katagiri and the claimed invention are deemed non-obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Omar Rojas whose telephone number is (571) 272-2357 and whose e-mail address is *omar.rojas@uspto.gov*. The examiner can normally be reached on Monday-Friday (7:00AM-3:00PM).
